REVENUE CYCLE MANAGEMENT

OPTIMIZING CASH FLOW

Compliantly optimizing reimbursements is the solid foundation upon which every practice builds its success. Creating that foundation through financial stability and optimal revenue and profitability requires expert managed care contracting, coding, billing, collections and comprehensive ICD-10 knowledge. A team dedicated to you, understanding your practice and its nuances.

At Integrated Medical Partners (IMP), we custom-tailor our software, processes and services to fit each of our clients' specific needs.

THESE SERVICES INCLUDE:

- Client-driven management reporting and analysis
- Full charge capture and verification
- Certified coding, review and training
- Systematic denial and A/R management
- Automated reimbursement variance tracking
- Dictation and documentation feedback
- Dedicated Client Services team

"Our revenue increased immediately when we transitioned to IMP. In addition, we received a dedicated client service manager who closely monitors our activity and provides reports that are an invaluable tool to me in analyzing modality, income, A/R and physician activity. Their extensive knowledge about practice billing combined with their commitment to excellence has truly provided constant support to our cardiology group for the past 11 years."

-Joan Morrell, Cardiovascular Health Consultants
